

Table of Contents:

Section 1: General considerations of diseases, production, and Management

1. Introduction to diseases, production and Management
2. Breeds of cattle and analysis of productivity in India
3. Identification for Selection and Rearing of Cattle
4. Cattle production and livelihood security
5. Dehorning in Cattle
6. Wound or injury prevention / treatment

Section 2: Production and management of cattle

7. Housing and ventilation of cattle
8. Nutrition of cattle
9. Feeds, feeding equipment, and feeding habits of cattle
10. Impact of stress on cattle production
11. Genetic markers and herd improvement of cattle
12. General reproduction and reproductive management of cattle
13. General health, and management of cattle
14. Herd health planning and management statistics
15. Herd health diagnostics test: Types, characteristics, and interpretation
16. Productive performance of cattle
17. Biotechnological and genomic approaches in breeding of cattle
18. Care and management of life stages of dairy cattle
19. Transportation and health management of cattle
20. Manure production and waste management of cattle
21. Cattle farming and business for financial upliftment
22. Entrepreneur development through cattle farming
23. Diseases prevention, environment and animal welfare
24. Implications of cross-breeding in dairy and beef cattle

Section 3: Calf care and Management

25. Pregnancy and the pre-partum outcomes
26. Calving and its clinical management
27. Colostrum management and its importance for calves
28. Handling of calves
29. Dairy calf housing and environmental management
30. Feeding the pre-weaned calf and its management
31. Monitoring calf growth rate and weaning management
32. Care of beef calf and weaning management
33. Calf health management practices
34. Beef animal production
35. Economic analysis of calf rearing
36. Management strategies for calf welfare

Volume 4: Clinical diseases of cattle

37. Electrolyte balance and fluid therapy of cattle
38. Diseases of the respiratory system of cattle
39. Diseases of the endocrine system of cattle
40. Diseases of the cardiovascular system of cattle
41. Diseases of the nervous system of cattle
42. Diseases of the elementary system of cattle
